

Geometry Vocabulary List
Quiz will be on Friday, December 12th
Quiz will be a Matching Quiz

1. **Acute Angle**- an angle measuring more than 0 but less than 90 degrees
2. **Area** – Surface space that is measured in square units
3. **Edge** – The line segment where two faces of a solid figure meet
4. **Face** – The flat surface of a solid figure
5. **Obtuse Angle** – An angle measuring more than 90 but less than 180 degrees
6. **Parallel** – lines in the same plane that do not intersect
7. **Perimeter** – the distance around a figure
8. **Perpendicular** –Intersecting lines that cross to form a 90 degree angle
9. **Reflection** – a mirror image of a figure drawn across a line of symmetry
10. **Right Angle** – an angle that measures 90 degrees
11. **Rotation** – turning a figure without changing its size or shape
12. **Straight Angle** – an angle that measures 180 degrees
13. **Translation** – a change in position, resulting from a slide with no turn
14. **Vertices** – the plural version of vertex, more than one vertex. The point of intersection for two sides of a plane figure, three sides of a solid figure, or the endpoints of two rays that form an angle
15. **Volume** – the amount of space an object takes up. It is usually measured in cubic units.
